System Architecture

Overview

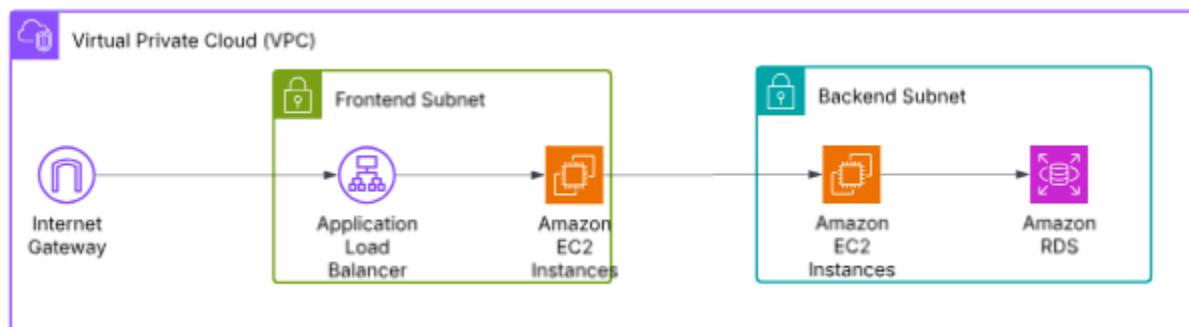

The InterestLink application is deployed on AWS using a multi-tier architecture for improved security, scalability, and separation of concerns. The system consists of the following core components:

1. **Frontend Layer:** EC2 instance running Flask
2. **Backend Layer:** EC2 instance running Express
3. **Database Layer:** AWS RDS running MySQL

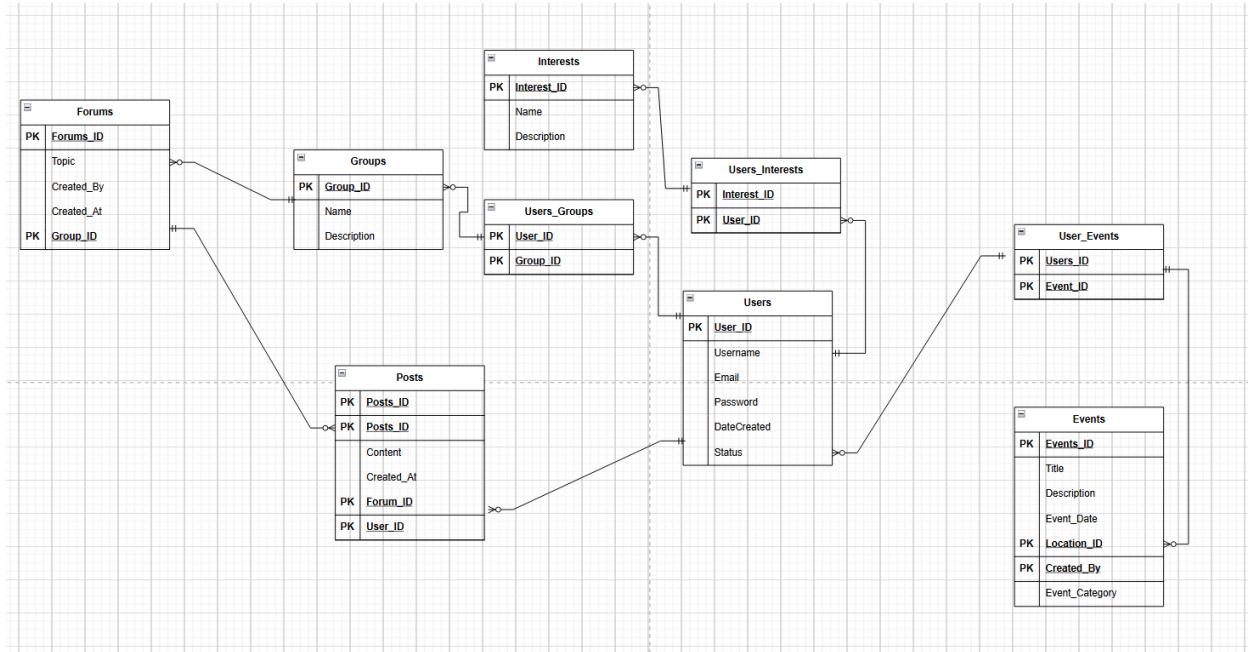

Network Architecture

The application is deployed within a Virtual Private Cloud (VPC) with the following subnet configuration:

- **Public Subnet:** Contains the frontend EC2 instance and is accessible from the internet
- **Private Application Subnet:** Contains the backend EC2 instance, isolated from direct internet access
- **Private Database Subnet:** Contains the RDS instance, accessible only by the backend

Updated DFD

Context

Level 0

Final User Documentation

Getting Started

Create an Account

1. Click "Register" on the homepage
2. Enter your username, email, and password
3. Click "Create Account"

Log In

1. Click "Login" on the homepage
2. Enter your email and password
3. Click "Log In"

Bio

1. Control your account by clicking on settings
2. Add a bio and click update profile

Change Password

1. Click on settings
2. Enter in new password
3. Confirm new password

Finding Things to Do

Discover Events

1. Click "Events" in the menu
2. Browse events based on your interests

3. Click on any event for details
4. Click "RSVP" to join

Create an Event

1. Click "Create Event" on the Events page
2. Fill in event details (title, date, location)
3. Select related interests
4. Click "Create"

Join Groups

1. Click "Groups" in the menu
2. Find a group you like
3. Click "Join Group"

Start a Group

1. Click "Create Group" on the Groups page
2. Name your group and add a description
3. Select related interests
4. Click "Create Group"

Connecting with Others

Join Discussions

1. Go to any group you've joined
2. Click "Forums"
3. Read and reply to topics or create your own

Find People with Similar Interests

1. Click "Matches" in the menu
2. Browse suggested connections
3. Click "Connect" to send a request

Logs

Decision Logs

InterestLink Project Decision Log

ID	Decision	Description	Comments	Owner	Status
1	Technology Stack Selection	Selected Express.js for frontend and Flask for backend	Frontend will handle UI rendering EJS templates while backend Use of RESTful APIs	Architecture Team	Approved
2	MySQL for backend	MySQL selected as the database technology for the application	Relational database needed	Database Team	Approved
3	AWS with cost analysis for servers	AWS selected as the cloud provider with EC2, RDS, and VPC	Cost analysis shows t3.medium for frontend, t3.large for backend, and db.t3.large for RDS will be sufficient	Infrastructure Team	Approved
4	Three-tier architecture	Implemented separate tiers for presentation,	Improves security and scalability by isolating components	Architecture Team	Approved

		application logic, and data			
7	Session-based authentication	Implemented session-based auth using express-session	Simpler implementation than token-based for this application structure	Security Team	Approved
8	Bootstrap for UI framework	Selected Bootstrap 5 for frontend styling	Provides responsive design and consistent UI components with minimal custom CSS	UI Team	Approved
9	Manual database backups	Weekly manual snapshots in addition to automated RDS backups	Ensures additional recovery points beyond the automated 7-day retention	Operations Team	Approved

Change Control Logs

InterestLink Simple Change Log

ID	CHANGE	REASON	STATUS
1	Removed interest-based matching feature	Simplify MVP for faster launch	Complete
2	Removed role-based access control	Simplify security model	Complete
3	Updated database schema	Remove unnecessary tables after feature changes	Complete

4	Removed related API endpoints	Clean up deprecated functionality	Complete
5	Updated user interface	Remove matching elements from dashboard	Complete
6	Updated documentation	Reflect current iteration	Complete

Issues Log

InterestLink Simple Issues Log

ID	ISSUE	SEVERITY	STATUS	OWNER
1	Database connection timeout	High	Fixed	Database Team
2	Session data lost after server restart	Medium	Fixed	Backend Team
4	Event creation fails	High	Fixed	Backend Team
5	Slow page loads	Medium	Fixed	Frontend Team
6	Search not working	Medium	Fixed	Backend Team
8	Login not working	High	Fixed	UI Team
9	Registration API not working	Medium	Fixed	Backend Team
10	SSL certificate expiration warning	High	Fixed	DevOps Team

Revised Market Analysis

InterestLink Market Strategy & Revenue Roadmap

Current Market Strategy

Core Business Model

- **Standard Website Experience** - A unified experience for all users without tiered access
- **Interest-Based Community Platform** - Connecting users based on shared interests, events, and groups
- **Partnership Revenue Focus** - Primary monetization through business partnerships

Current Revenue Stream: Partnership Model

1. **Event Advertising Revenue**
 - Partners pay to promote their events on the platform
 - Targeted promotion based on user interests and groups
 - Pricing tiers based on promotion prominence and duration
2. **Partner Integration Opportunities**
 - Featured partner groups within the platform
 - Partner-sponsored forums and discussion threads
 - Exclusive partner-hosted virtual and physical events
3. **Value Proposition to Partners**
 - Access to highly segmented interest groups
 - Higher conversion rates through interest-based targeting
 - Direct engagement with relevant community members
4. **Current Pricing Structure**
 - Event promotion: \$10-\$15 per event based on targeting options
 - Featured partner status: \$30 per month

Key Performance Indicators

- Partner acquisition rate
- Event promotion conversion rates
- User engagement with partner content
- Revenue per partner

Future Revenue Possibilities

1. Premium Membership Options

- **Enhanced Profile Features** - Advanced customization
- **Premium Content Access** - Exclusive webinars, courses, and digital resources

2. Transaction-Based Revenue

- **Marketplace for Interest-Based Services/Products** - With commission structure
- **Paid Events & Workshops** - Platform fee for paid event registrations
- **Expert Connection Service** - Facilitating paid consultations with subject matter experts
- **Digital Content Sales** - Courses, guides, or other content related to specific interests

3. Data & Insights

- **Aggregated Trend Reports** - Selling anonymized interest trends to market researchers
- **Custom Research Opportunities** - Opt-in research panels for partners
- **Industry Benchmarking** - Comparative data on community engagement
- **Predictive Interest Analytics** - Early trend identification for partners

4. Enterprise Solutions

- **Corporate Team Building** - Interest-based team formation and activities
- **Enterprise Community Management** - Private instances for large organizations
- **HR & Recruitment Tools** - Interest-based candidate matching
- **B2B Networking Platform** - Business partnership matchmaking based on complementary interests

5. Value-Added Services

- **Personalized Interest Recommendations** - AI-driven content and connection suggestions
- **Enhanced Discovery Tools** - Advanced search and filtering capabilities
- **Custom Group Features** - Enhanced tools for group administrators
- **Integration with External Platforms** - Calendar systems, productivity tools, social media

Scalability

InterestLink: Scalability Strategy

Business Growth Opportunities

- **Expansion:** Geographic and demographic market reach
- **Data Analytics:** Enhanced recommendation capabilities
- **Freemium Models:** Tiered service offerings
- **Additional Revenue Streams:** Partnerships, premium features, advertising

Technical Implementation with AWS

Infrastructure Advantages

- **Secure & Reliable Scaling:** Enterprise-grade security with high availability
 - **Exponential User Growth Support:** Architecture designed for rapid audience expansion
 - **Autoscaling Capabilities:** Dynamic resource allocation based on traffic patterns
 - **Consistent Performance:** Maintained responsiveness during usage spikes
 - **Deployment Strategy**
 - **CloudFormation Implementation:** Rapid infrastructure deployment
 - **Security Best Practices:** Built-in compliance and protection measures
 - **Reliability Architecture:** Redundancy and fault tolerance
 - **Application Support Framework:** Optimized for InterestLink's specific needs
 - **Growth Projection**

As users are attracted to the platform, our AWS infrastructure will seamlessly scale to maintain performance while optimizing operational costs.

Automation

InterestLink: Automation Strategy

Key Automations

- **User-Facing**
 - AI recommendations for events/businesses
 - Smart notifications
 - Content filtering
- **Business Insights**
 - Automated listing verification
 - Campaign optimization
 - Analytics dashboard generation
- **Infrastructure**
 - On-demand resource scaling
 - AI-powered content moderation
 - Security monitoring
 - Cloudformation

Results

- 70% less manual content management
- 3x better user-event matching
- Support for 100x growth with minimal staff increase
